

Advanced Research Methods in Psychology

PSYC 118

Fall 2025 In Person 3 Unit(s) 08/20/2025 to 12/08/2025 Modified 08/18/2025

Contact Information

- Instructor: Hyesang Chang, PhD
- Email: hyesang.chang@sjsu.edu
- Office hours: Tuesday, Thursday 12:30-1:00pm in DMH 230 or by appointment

Course Information

Descriptive, correlational, quasi-experimental, and experimental approaches: design, methodology, and analysis. Experience designing, conducting, analyzing, and presenting (verbal and written) research findings. Topics include: hypothesis testing, validity, reliability, scales of measurement, questionnaire development, power, statistical significance, and effect size.

Prerequisite: Lower division GE complete; STAT 95, PSYC 18, PSYC 100W with a "C" or better (or departmental approval), Upper division standing, Psychology or Behavioral Science majors only.

- Class time and location:
 - Psyc 118-30 (lecture): Tuesday, Thursday 9:00-9:50am in DMH 357
 - Psyc 118-31 (lab): Tuesday 10:15am-12:15pm in DMH 339
 - Psyc 118-32 (lab): Thursday 10:15am-12:15pm in DMH 339
 - Psyc 118-40 (lecture): Tuesday, Thursday 1:30-2:20pm in BBC 130
 - Psyc 118-41 (lab): Tuesday 3:00pm-5:00pm in DMH 339
 - Psyc 118-42 (lab): Thursday 3:00pm-5:00pm in DMH 339
- Please attend the lecture and lab sections that you are enrolled in. You can find the locations of the buildings from [Campus map](#).
 - BBC: Boccardo Business Classroom
 - DMH: Dudley Moorhead Hall

Classroom Protocols

Course Format. In lectures, we will learn advanced research methods through course materials, presentations, and question-and-answer periods. During the laboratory section we will learn how to apply the principles of advanced research methods to a research project, conduct research, and prepare the write-up and presentation of the research project.

Participation. You are expected to attend the lecture and lab sections that you are enrolled in for the course. Regular attendance is critical for successful completion of this course.

According to University Policy F15-12, "Students are expected to attend all meetings for the courses in which they are enrolled as they are responsible for material discussed therein and active participation is frequently essential to ensure maximum benefit to all class members. In some cases, attendance is fundamental to course objectives; for example, students may be required to interact with others in the class. Attendance is the responsibility of the student. Participation may be used as a criterion for grading when the parameters and their evaluation are clearly defined in the course syllabus and the percentage of the overall grade is stated."

Credit Hour Definition. To be successful in courses at SJSU, it is expected that students will spend a minimum of forty-five hours for each unit of credit (a 3 unit class would be approximately 9 hours per week), including preparing for class, participating in course activities, completing assignments. More details about student workload can be found in [University Policy \(http://www.sjsu.edu/senate/docs/S12-3.pdf\)](http://www.sjsu.edu/senate/docs/S12-3.pdf).

Classroom Environment. This class will be conducted in an atmosphere of mutual respect. I encourage your active participation and welcome respectful discourse. Your language and conduct during the class period must demonstrate respect for everyone's race, gender identity, or expression, sexuality, culture, beliefs, and abilities.

Students are expected to maintain a level of professional and courteous behavior at all times. You are required to put your cell phone and other distractions away before the beginning of class and closed-notes assessment. Cell phones or other electronic devices may be used during submission of class activity assignments.

Program Information

Program learning outcomes (PLOs) are skills and knowledge that students will have achieved upon completion of the Psychology BA degree. Each course in our curriculum contributes to one or more of these PLOs. The PLOs for the Psychology BA degree are:

1. Knowledge Base of Psychology. Students will be able to demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.
2. Research Methods in Psychology. Students will be able to design, implement, and communicate basic research methods in psychology, including research design, data analysis, and interpretations.
3. Critical Thinking Skills. Students will be able to use critical and creative thinking, skeptical inquiry, and a scientific approach to address issues related to behavior and mental processes.
4. Applications of Psychology. Students will be able to apply psychological principles to individual, interpersonal, group, and societal issues.

Values in Psychology. Students will value empirical evidence, tolerate ambiguity, act ethically, and recognize their role and responsibility as a member of society.

Course Learning Outcomes (CLOs)

Upon successful completion of this course, students will be able to:

- CLO1. Understand how scientific methods are used in psychological research
- CLO2. Summarize the differences between different types of research designs used in psychological research
- CLO3. Determine advantages and disadvantages of specific research methods for different situations
- CLO4. Evaluate whether research participants are treated ethically and understand the importance of ethical treatment of participants
- CLO5. Identify potential factors that can affect the ability to address a research question and how to reduce or eliminate these factors
- CLO6. Use statistical analyses appropriately and interpret the results
- CLO7. Provide strengths and limitations of research studies and draw appropriate conclusions from research findings
- CLO8. Design and carry out a research study from beginning to end (including writing a research report)

Course Materials

Required Text:

- Research Methods in Psychology, 4th edition, by Jhangiani, Chiang, Cuttler, & Leighton. This book is available at no cost from online (<https://kpu.pressbooks.pub/psychmethods4e>). If students would like a printed copy, it can be purchased on Amazon.com.
- Any other readings will be made available through Canvas.

Course Requirements and Assignments

Technology Requirements. Students will need access to the internet and Canvas site to submit assignments. Submission of assignments may occur during class periods with an electronic device that can access the Canvas site (phone, tablet, or laptop). Students will have access to a computer during lab periods. If you do not have a laptop but would like one, you may borrow one from the Student Computing Center in the SJSU library. We will be using [Microsoft](https://www.sjsu.edu/it/services/applications/office.php) (<https://www.sjsu.edu/it/services/applications/office.php>) Word and Excel, [Qualtrics](https://www.sjsu.edu/cfeti/software/research/qualtrics/index.php) (<https://www.sjsu.edu/cfeti/software/research/qualtrics/index.php>), and [SPSS](https://www.sjsu.edu/it/services/support/desktop/instructions.php) (<https://www.sjsu.edu/it/services/support/desktop/instructions.php>) for data collection, management, and analysis and preparation of research report. Microsoft Powerpoint or Google Slides can be used for poster presentations.

Assignments. The primary methods of assessment for this course will be class and lab activities, quizzes, a poster presentation, a research report, a final exam, and research project participation. Each assignment is designed to prepare you to successfully complete your research proposal, study, and report write-up for your research project. Additional instructions will be available on Canvas.

Course information activities. Students will complete course information activities in the beginning and at the end of the course. In the first week of the course, students will complete a course information quiz to become familiar with course requirements. Questions will cover information included the syllabus and course website. Students will also complete a beginning semester survey to indicate their research interests and learning goals for the course. In the last week of the course, students will submit a group contribution evaluation to assess their group members' (including their own) contribution to research projects. Course information activities will be graded as complete or incomplete and are worth 2% of the grade.

Class activities (CLOs 1-7). Students will participate in various class activities and submit their responses on Canvas to enhance their learning throughout the course. A total of six class activity assignments will be graded as complete or incomplete and one lowest grade will be dropped. Class activities are worth 5% of the grade.

Lab activities (CLOs 1-7). Students will collaborate with their research group and complete a total of five lab activity assignments, each worth 5% of the grade (25% total). Lab activity assignments will include literature search (CLO 1), literature summary (CLOs 2-4), design summary (CLOs 1-3), research proposal (CLOs 1-5), and preliminary data summary (CLOs 6-7). Completion of lab activities is integral to the preparation of poster presentation and research report.

Quizzes (CLOs 1-7). There will be a total of four quizzes, each worth 2% of the grade (8% total). Questions will include multiple-choice and short answers. Quizzes will be open-notes and there will be 30 minutes to complete each quiz on Canvas. Each quiz will cover several topics in the course. The first quiz will include scientific research methods and ethical considerations (CLOs 1-4). The second quiz will include non-experimental and experimental research designs (CLOs 2,3,5,7). The third quiz will include factorial designs, single-subject research, presenting research, and descriptive statistics (CLOs 2,3,6,7). The fourth quiz will include inferential statistics and topics in data analysis (CLOs 6-7).

Poster presentation (CLOs 4-7). Students will create a poster that outlines the research study design and findings. Posters will be presented through presentation slideshow during scheduled times in class. Submission and presentation of the poster is worth 10% of the grade. During poster presentation sessions, students will participate as peer reviewers for other groups' presentations and submit peer review forms. Completion of peer review forms will count towards extra credit (5% of the grade) for the course.

Research report (CLOs 4-8). Students will develop a full research report in APA style. The report will include introduction of study background, description of study design and statistical analysis, interpretation of findings, and discussion of strengths and limitations of the study. It may take several drafts to finalize the report and many of class activities are designed to help you develop the report. It is expected that the sections of title page, abstract, and discussion are individually written. Introduction, methods, and results sections may be shared with group members with their contributions acknowledged. The final research report is worth 35% of the grade and are subject to late work policy.

Research participation (CLOs 4-8). Students will participate in creating and conducting a research project in collaboration with research group members. Research groups will be created and meet during the lab section. Active participation with group members is required for successful completion of the research project and is worth 5% of the grade. Participation in research projects will be assessed by group evaluations at the end of the semester.

Final exam (CLOs 1-7). There will be a cumulative final exam during scheduled final exam time at the end of the course, which is worth 10% of the grade. Questions will include multiple-choice and short answers, administered in class in a paper-and-pencil format. The final exam will be closed-notes and cover all topics learned in the course.

Attendance. Attendance is critical for success in this course. If you miss a class, you are responsible for the information from that class. It is vital that you complete all scheduled readings and assignments as listed in the Course Schedule before each class. Please note that the Course Schedule is tentative and subject to change with fair notice, including assignment due dates.

Late work policy. Students should pay close attention to deadlines and start early on their assignments to avoid technical problems. Late assignments (lab activity, quiz, or research report) will be graded down 5% for each day that they are late. Extension for scheduled assessments (poster presentation or final exam) will not be allowed without a serious reason and instructor approval.

✓ Grading Information

Breakdown

| Assignment | Frequency | Points per assignment | Total points |
|-------------------------------|-----------|-----------------------|--------------|
| Course information activities | 3 | 0.5 - 1 | 2 |
| Class activities | 5 | 1 | 5 |
| Lab activities | 5 | 5 | 25 |
| Quizzes | 4 | 2 | 8 |

| | | | |
|------------------------------------|---|----|-----|
| Poster submission and presentation | 1 | 10 | 10 |
| Research report | 1 | 35 | 35 |
| Research project participation | 1 | 5 | 5 |
| Final exam | 1 | 10 | 10 |
| Total | | | 100 |

| Grade | Percent range |
|---------|---------------|
| A | 94-100 |
| A minus | 90-93 |
| B plus | 87-89 |
| B | 83-86 |
| B minus | 80-82 |
| C plus | 77-79 |
| C | 73-76 |
| C minus | 70-72 |
| D plus | 67-69 |
| D | 63-66 |
| D minus | 60-62 |
| F | 59 or below |

Academic integrity

Your commitment, as a student, to learning is evidenced by your enrollment at San Jose State University. The [Academic Integrity Policy \(https://www.sjsu.edu/senate/docs/F15-7.pdf\)](https://www.sjsu.edu/senate/docs/F15-7.pdf) requires you to be honest in all your academic course work. Faculty members are required to report all infractions to the office of [Student Conduct and Ethical Development \(http://www.sjsu.edu/studentconduct/\)](http://www.sjsu.edu/studentconduct/).

A few examples of academic integrity in this course may include:

1. Students provide their original work and any inclusion of work by others is properly cited.
2. Each group member contributes to all aspects of their group project, with the exception of the final research report which includes individual work.
3. Students complete closed-notes assessment without referencing notes.

Plagiarism or cheating. San José State University defines plagiarism as the act of representing the work of another as one's own without giving appropriate credit, regardless of how that work was obtained, and submitting it to fulfill academic requirements. Cheating is defined as the act of obtaining credit, attempting to obtain credit, or assisting others to obtain credit for academic work through the use of any dishonest, deceptive, or fraudulent means. If students have any questions about an assignment they are preparing, they should ask their instructor for clarification rather than risk unintentional plagiarism.

Artificial Intelligence (AI). Completing the assignments in this course does not require the use of AI. It often leads to errors and citations of references that don't exist. Relying on AI tools can also interfere with your learning and development of critical thinking skills. The use of generative AI tools is not permitted in this course without my approval. In rare circumstances in which I approve the use of AI tools, it is important to use them cautiously and properly cite them – otherwise this will be considered plagiarism. Any assignment that uses pre-approved AI tools must include an Appendix with (1) the entire AI interaction, highlighting key parts, (2) which AI tools you used and how, and (3) why you used the AI tools. Students should discuss any concerns about AI use with the instructor beforehand.

Consequences of Academic Dishonesty. Plagiarism or cheating is not tolerated in this course. In cases of violation of academic integrity, the instructor may issue a failing grade ("F") or "0" for the assignment in question and refer the student to the Office of Student Conduct and Ethical Development (SCED) for disciplinary action.

University Policies

Per [University Policy S16-9 \(PDF\) \(http://www.sjsu.edu/senate/docs/S16-9.pdf\)](http://www.sjsu.edu/senate/docs/S16-9.pdf), relevant university policy concerning all courses, such as student responsibilities, academic integrity, accommodations, dropping and adding, consent for recording of class, etc. and available student services (e.g. learning assistance, counseling, and other resources) are listed on the [Syllabus Information \(https://www.sjsu.edu/curriculum/courses/syllabus-info.php\)](https://www.sjsu.edu/curriculum/courses/syllabus-info.php) web page. Make sure to visit this page to review and be aware of these university policies and resources.

Course Schedule

| Week | Topics and readings | | Assignments (due Friday 11:59pm) |
|------------|---------------------|--|--|
| 1: 8/21 | Lecture | Course Introduction | Course Information Activity 1: Course Information Quiz Course Information Activity 2: Beginning Semester Survey |
| | Lab | No Lab Session | |
| 2: 8/26-28 | Lecture | Science of Psychology (Chapter 1) Overview of Scientific Method (Chapter 2 pt1: 7-10) Class Activity 1 | |
| | Lab | Lab Introduction; Literature Search | |
| 3: 9/2-4 | Lecture | Overview of Scientific Method (Chapter 2 pt2: 11-14) Research Ethics (Chapter 3) | Lab Activity 1: Literature Search Quiz 1: Chapters 1-3 |
| | Lab | Literature Review | |
| 4: 9/9-11 | Lecture | Baumeister et al. (2007) Psychological Measurement (Chapter 4) Class Activity 2 | Lab Activity 2: Literature Review |
| | Lab | Sampling and Measures | |
| 5: 9/16-18 | Lecture | Non-Experimental Research (Chapter 6) Survey Research (Chapter 7) | Lab Activity 3: Design Summary |
| | Lab | Study Design | |

| | | | |
|--------------|---------|--|--|
| 6: 9/23-25 | Lecture | Experimental Research (Chapter 5) Quasi-Experimental Research (Chapter 8) Class Activity 3 | Quiz 2: Chapters 4-8 |
| | Lab | Research Proposal Preparation | |
| 7: 9/30-10/2 | Lecture | Factorial Designs (Chapter 9) Roediger & Karpicke (2006) | Lab Activity 4: Research Proposal |
| | Lab | Research Proposal Preparation | |
| 8: 10/7-9 | Lecture | Boot et al. (2013) Single-Subject Research (Chapter 10) Class Activity 4 | |
| | Lab | Data Collection Preparation | |
| 9: 10/14-16 | Lecture | Presenting Research (Chapter 11) Descriptive Statistics (Chapter 12) | Quiz 3: Chapters 9-12 |
| | Lab | Descriptive Statistics and Correlations | |
| 10: 10/21-23 | Lecture | Data Summary Inferential Statistics (Chapter 13; pt1: 57-58) Class Activity 5 | |
| | Lab | Inferential Statistics: t-tests and ANOVA | |
| 11: 10/28-30 | Lecture | Inferential Statistics (Chapter 13; pt2: 59-61) Tackett et al. (2017) | Lab Activity 5: Preliminary Data Summary |
| | Lab | Inferential Statistics: Linear Regression and More | |

| | | | |
|----------------------|---------|---|---|
| 12: 11/4-6 | Lecture | Presentation Preparation Shrout & Rodgers (2018) Class Activity 6 | Quiz 4: Chapter 13 |
